

Activity 6

Calendar and image

- 1.1) Create a Web application for Speedy delivery similar to the figure below. You must show a picture on the website. (First you must add your picture to the web site folder and then use the Image control and then set the ImageURL property).
- 1.2) The client selects a dropoff date and the estimated delivery date is displayed. Estimate two days for delivery but add an extra day when items are dropped off on Friday, Saturday or Sunday.
